Macabre Masterpiece: Macbeth at Fort Point is Truly an Epic of Shakespearean Proportions

As the fog, wind, and waves pound the walls of the brick fortress beneath the Golden Gate Bridge, there's a struggle of power to ascend the throne playing out as key players are being assassinated in a game of metaphorical royal chess. Their screams of anguish, doubt, and pain echo through the halls and everyone present after dusk becomes captive prisoners and witnesses who are heavily and intricately involved with the unfolding drama.

This may seem like some sort of ghost horror story being narrated in San Francisco's Presidio but it is simply theatre. No, not the theatre of life but of Shakespearean proportions.

For a limited time there's live theatre being enacted behind the stone walls of this abandoned fortress. We Players is currently performing a dramatic and classical performance of Shakespeare's Macbeth under the iconic Golden Gate Bridge for the next two weekends— and the results are simply breathtaking and fantastic because for three hours, you forget that you are directly under the the biggest tourist attraction of San Francisco because you revel and immersed in the world of medieval Scotland.
